RESOLVING STRONG FIELD DYNAMICS IN CATION STATES OF CO₂ VIA OPTIMISED MOLECULAR ALIGNMENT

Springer. Hardcover. Condition: New. 205 pages. Dimensions: 9.3in. x 6.3in. x 0.7in. This thesis presents an experimental study of the ultrafast molecular dynamics of CO₂ that are induced by a strong, near-infrared, femtosecond laser pulse. In particular, typical strong field phenomena such as tunneling ionisation, nonsequential double ionisation and photo-induced dissociation are investigated and controlled by employing an experimental technique called impulsive molecular alignment. Here, a first laser pulse fixes the molecule in space, such that the molecular dynamics can be...

Reviews

I just started off reading this article pdf. It is probably the most remarkable ebook we have go through. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Jeanette Kreiger**

Thorough guideline! Its this kind of excellent read. This is certainly for all those who statte there was not a well worth reading. Your way of life period will probably be transform once you complete reading this book.
