By Unknown Author

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Fifteenth Annual Report of the Chemical Division of the Laboratory of Hygiene It was soon realized that wholesomeness and cleanliness in food and drugs could be obtained only by control at the source of production and places of distribution. This control was secured through the passage of the Sanitary Food Law of 1909. Under the provisions of both the Pure Food Law and the Sanitary Food Law all state, county, city and town health officers are deputies of the State Department This arrangement greatly facilitates cooperative work between the State Department and local health departments. A splendid example of this cooperation was the Investigation of infected olives during the latter part of 1919, which had caused serious botulinus poisoning in several states. Within a few days through the assistance of local health officers every lot of ripe olives of any considerable size was located and the investigation quickly completed. Many special investigations have been carried on with the aid of these officers who have shown great willingness to cooperate at all times. The similarity of...
