Springer. Paperback. Condition: New. 208 pages. Dimensions: 9.6in. x 6.7in. x 0.5in. The significance of a change in PaO₂ occurring in a patient with cardiovascular instability cannot be ascertained unless the values for PVO and CVO₂ are known. A fall in PaO₂ could reflect worsening of pulmonary function or deterioration of cardiac output (with resultant increase in systemic oxygen extraction). PEEP/PAP would be an appropriate therapy in the former case but frankly deleterious in the latter if applied prior to cardiovascular stabilization. References 1.
