Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Not just a how-to guide. A what, when, where, how, and why-to guide. Are you a manufacturing manager, engineer, technician, or operator responsible for creating or updating procedures? Then you know that accurate documentation is critical for training, operations, and reference. But without a well-defined structure and intuitive, practical content, a documentation system can also turn into a liability-a high-maintenance, resource-draining monster. Jason Tesar is an expert technical writer and editor with over 20 years of experience working in engineering-intensive manufacturing operations. In *Writing Manufacturing Procedures*, he walks you through concepts and methods tested under the most demanding production and service environments. You ll learn what information is necessary to support a robust manufacturing process, how to segment that information to expand its usability, and how to present it to readers for maximum comprehension. Utilizing three basic document types-each with a specific function-you ll discover how to construct your own system with efficient, thorough content that will remain relevant as your business grows.
